OFFICE MEMORANDUM NO. 005

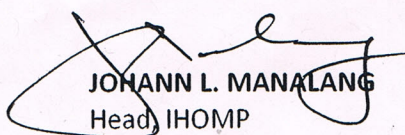

TO : ALL UNITS

SUBJECT : FIRMWARE UPGRADE AND HARDWARE REPLACEMENT ON SPMC SERVER  
ENCLOSURE and VIRTUAL CONNECT

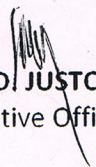

Last June 12, 2015 IHOMP Office released an Office Memorandum regarding the Upgrade of Firmware of SPMC Server Enclosure and declared a 3-hour downtime on all SPMC System (HIS, ENGAS, DTR and EMR) but it did not happen. The HP engineer tried other solutions to resolve the issue during that date but it does not work. Today HP Engineer is here in IHOMP Office to again try to resolve and fix some issues on HP Blade Servers and he told us that there will be about 3hours downtime during this upgrading.

IHOMP Office would like to set it this afternoon June 22, 2015 start at 5:30pm up to 8:30pm to lessen the offices that will experience shutdown since there is no OPD at this time. Sorry for the short notice but we need to do this to resolve and to avoid bigger problems in the future. Please bear with us and we hope that we can fix this as fast as we can to avoid backlogs. We apologize for the inconvenience.
