OFFICE MEMORANDUM NO. 001\_s. 2020

**TO** : All Satellite Pharmacy  
: All Nursing Wards  
: All Special Areas (ER, OR, ASU and RDU)  
: IPBM

**SUBJECT** : Temporary disconnection of HIS from WRIS (Inventory System)

---

This is to inform everyone that we will temporarily disconnect the Hospital Information System from the Wholesale-Retail Inventory System (WRIS) starting tomorrow (**August 28**) at **9am**. This is to isolate the cause of slowdown in the WRIS (Inventory System). For more than three (3) months we experienced slowdown on the Inventory System and the end-users always request for a reset on the Inventory Server. This is not normal and to isolate the problem we need to disconnect the HIS to see if there is an effect on the integration of the two systems. The temporary disconnection is for one week only and during this period you can directly use WRIS and manually deduct the items issued to patients to update your stocks. For other concerns or clarifications, you may call IHOMP @ Local No. 5043.

  
**JOHANN L. MANALANG**  
Head, IHOMP
