J.P. Laurel Avenue, Davao City

A D V I S O R Y

There will be a system shutdown of our Laboratory Information System (LIS) this coming January 26, 2019 from 11:00 p.m. to 5:00 a.m. in order to give way for its upgrade and bug fixes.

We would like to ask that routine laboratory be ordered earlier so it can be processed before the system shutdown.

During system shutdown, laboratory requests can still be ordered thru the HIS but will only be processed after the system upgrade.

EMERGENCY/STAT CASES can still be processed on a manual basis. But the results cannot be retrieved from the HIS.

Previous Laboratory results can still be views at the HIS during the system upgrade.

Please be guided accordingly.
