

Philippine Integrated Disease Surveillance and Response

Case Investigation Form Coronavirus Disease (COVID-19)

Version 7

General Instructions

1) The Case Investigation Form is meant to be administered as an Interview by a health care worker or any personnel of the Disease Reporting Unit. This is not a Self-Administered Questionnaire.

Area:

2) Please be advised that Disease Reporting Units are only allowed to obtain 1 copy of accomplished CIF from a patient.

3) Please fill out all blanks and put a	check mark	on the ap	opropriate b	ox. Never leave an item	blank, just w	rite N/A or not applica	able. Items with		
* are required fields.		Case Num	abor:		LIDNI				
4) All dates must be in MM/DD/YYYY format.					_	HRN:

Appendix 1. Testing Category/Subgroup

- Sub-group A: Individuals with severe/critical symptoms and relevant history of travel and/or contact
- Sub-group B: Individuals with mild symptoms and relevant history of travel and/or contact, and considered vulnerable. Vulnerable populations include those elderly and with preexisting medical conditions that predispose them to severe presentation and complications of COVID-19
- Sub-group C: Individuals with mild symptoms, and relevant history of travel and/or contact
- Subgroup D: Individuals with no symptoms but with relevant history of travel and/or contact or high risk of exposure. These include:
 - Subgroup D1: Contact-traced individuals
 - o Sub-group D2: Healthcare workers, who shall be prioritized for regular testing in order to ensure the stability of our healthcare system.
 - o Subgroup D3: Returning Overseas Filipino Workers, who shall immediately be tested at the port of entry
 - Subgroup D4: Filipino citizens in a specific locality within the Philippines who have expressed intention to return to their place of residence/home origin (Locally Stranded Individuals) may be tested subject to the existing protocols of the IATF.
- Subgroup E: Frontliners indirectly involved in health care provision in the response against COVID-19 may be tested as follows:

- Sub-group E1: Those with high or direct exposure to COVID-19 regardless of location may be tested up to once a week. These include the following:
 - 1. Personnel manning the Temporary Treatment and Quarantine Facilities (LGU and Nationally-managed);
 - 2. Personnel serving at the COVID-19 swabbing center;
 - 3. Contact tracing personnel; and
 - 4. Any personnel conducting swabbing for COVID-19 testing.
- Sub-group E2: Those who do not have high or direct exposure to COVID-19 but who live or work in Special Concern Areas may be tested up to
 every two to four weeks. These include the following:
 - 1. Personnel manning Quarantine Control Points, including those from Armed Forces of the Philippines, Bureau of Fire Protection, and others;
 - 2. National/Regional/Local Risk Reduction and Management Teams;
 - 3. Officials from any local government/city/municipality health office (CEDSU, CESU, etc.)
 - 4. Barangay Health Emergency Response Teams and barangay officials providing barangay border control and performing COVID-19-related tasks:
 - 5. Personnel of Bureau of Corrections and Bureau of Jail Penology and Management;
 - 6. Personnel manning the One-Stop-Shop in the Management of the Returning Overseas Filipinos;
 - 7. Border control or patrol officers, such as immigration officers and the Philippine Coast Guard; and
 - 8. Social workers providing amelioration and relief assistance to communities and performing COVID-19-related tasks.
- Sub-group F: Other vulnerable patients and those living in confined spaces. These include, but are not limited to:
 - Pregnant patients who shall be tested during the peripartum period;
 - Dialysis patients;
 - o Patients who are immunocompromised, such as those who have HIV/AIDS, inherited diseases that affect the immune system;
 - o Patients undergoing chemotherapy or radiotherapy;
 - Patients who will undergo elective surgical procedures with high risk for transmission;
 - o Any person who have had organ transplants, or have had bone marrow or stem cell transplant in the past 6 months;
 - Any person who is about to be admitted in enclosed institutions such as jails, penitentiaries, and mental institutions.
- Subgroup G: Residents, occupants or workers in a localized area with an active COVID-19 cluster, as identified and declared by the local chief executive in accordance with existing DOH Guidelines and consistent with the National Task Force Memorandum Circular No. 02 s.2020 or the Operational Guidelines on the Application of the Zoning Containment Strategy in the Localization of the National Action Plan Against COVID-19 Response. The local chief executive shall conduct the necessary testing in order to protect the broader community and critical economic activities and to avoid a declaration of a wider community quarantine.
- Subgroup H: Frontliners in Tourist Zones:
 - o Sub-group H1: All workers and employees in the hospitality and tourism sectors in El Nido, Boracay, Coron, Panglao, Siargao and other tourist zones, as identified and declared by the Department of Tourism. These workers and employees may be tested once every four (4) weeks.
 - Sub-group H2: All travelers, whether of domestic or foreign origin, may be tested at least once, at their own expense, prior to entry into any designated tourist zone, as identified and declared by the Department of Tourism.
- Subgroup group I: All workers and employees of manufacturing companies and public service providers registered in economic zones located in Special Concern Areas may be tested regularly.
- Subgroup J: Economy Workers
 - Sub-group J1: Frontline and Economic Priority Workers, defined as those (1) who work in high priority sectors, both public and private, (2) have high interaction with and exposure to the public, and (3) who live or work in Special Concern Areas, may be tested every three months. These workers include, but are not limited to:
 - 1. Transport and Logistics
 - Drivers of Taxis, Ride Hailing Services (two and four wheels), Buses, Public Transport Vehicles
 - Conductors
 - Pilots, Flight Attendants, Flight Engineers
 - Rail operators, mechanics, servicemen
 - Delivery staff
 - Water transport workers ferries, inter island shipping, ports
 - 2. Food Retail
 - Waiters, Waitresses, Bar Attendants, Baristas
 - Chefs and Cooks
 - · Restaurant Managers and Supervisors
 - 3. Education once face to face classes resume
 - Teachers at all levels of education
 - Other school frontliners such as guidance counselors, librarians, cashiers
 - 4. Financial Services
 - Bank tellers
 - 5. Non-Food Retail
 - Cashiers
 - Stock clerks
 - Rerail salespersons
 - 6. Services
 - Hairdressers, Barbers, Manicurist, Pedicurist, Massage Therapists
 - Embalmers, Morticians, Undertakers, Funeral Directors
 - Parking Lot Attendants
 - Security Guards
 - Messengers

- Ushers, Lobby Attendants, Receptionist
- Clergy
- 7. Market Vendors
- 8. Construction
 - Carpenters
 - Stonemasons
 - Electricians
 - Painters
 - Construction workers, including Foremen, Supervisors
 - Civil Engineers, Structural Engineers, Construction Managers
 - Crane and Tower operators
 - Elevator installer and repairers
- 9. Water Supply, Sewerage, Waste Management
 - Plumbers
 - Recycling and Reclamation worker/ Garbage Collectors
 - Water/Wastewater engineers
 - Janitors and cleaners
- 10. Public Sector
 - Judges
 - Courtroom clerks, staff, and security
 - All national and local government employees rendering frontline services in Special Concern Areas
- 11. Mass media Field reporters, photographers, and cameramen

Appendix 2. COVID-19 Case Definitions

- Suspect COVID-19 case (two suspect case definitions A or B):
- A. A person who meets the clinical **AND** epidemiological criteria:

Clinical criteria:

1. Acute onset of fever AND cough;

OR

Acute onset of ANY THREE OR MORE of the following signs or symptoms: fever, cough, general weakness/fatigue¹, headache, myalgia, sore throat, coryza, dyspnoea, anorexia/nausea/vomiting, diarrhoea, altered mental status.

AND

Epidemiological criteria:

1. Residing or working in an area with high risk of transmission of the virus: for example, closed residential settings and humanitarian settings, such as camp and camp-like settings for displaced persons, any time within the 14 days prior to symptom onset;

OR

- 2. Residing in or travel to an area with community transmission² anytime within the 14 days prior to symptom onset;
- 3. Working in health setting, including within health facilities and within households, anytime within the 14 days prior to symptom onset.
- B. A patient with severe acute respiratory illness (SARI: acute respiratory infection with history of fever or measured fever of ≥ 38 °C; and cough; with onset within the last 10 days; and who requires hospitalization).

II. Probable COVID-19 case:

- **A.** A patient who meets clinical criteria above AND is a contact of a probable or confirmed case, or epidemiologically linked to a cluster of cases which has had at least one confirmed case identified within that cluster.
- B. A suspect case (described above) with chest imaging showing findings suggestive of COVID-19 disease*
- * Typical chest imaging findings suggestive of COVID-19 include the following (Manna 2020):
 - · chest radiography: hazy opacities, often rounded in morphology, with peripheral and lower lung distribution
 - chest CT: multiple bilateral ground glass opacities, often rounded in morphology, with peripheral and lower lung distribution
 - lung ultrasound: thickened pleural lines, B lines (multifocal, discrete, or confluent), consolidative patterns with or without air bronchograms.
- C. A person with recent onset of anosmia (loss of smell) or ageusia (loss of taste) in the absence of any other identified cause.
- **D.** Death, not otherwise explained, in an adult with respiratory distress preceding death AND who was a contact of a probable or confirmed case or epidemiologically linked to a cluster which has had at least one confirmed case identified within that cluster.

III. Confirmed COVID-19 case:

A person with laboratory confirmation of COVID-19 infection, irrespective of clinical signs and symptoms.

¹ Signs separated with slash (/) are to be counted as one sign.

² Community transmission: Countries /territories/areas experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains, large numbers of cases from sentinel lab surveillance or increasing positive tests through sentinel samples (routine systematic testing of respiratory samples from established laboratories), multiple unrelated clusters in several areas of the country/territory/area.
